Cælestial Diary:
OR, AN
EPHEMERIS

For the YEAR of Our
Blessed SAVIOUR's Incarnation,

1726.

It being the second after Bissextile, or Leap-Year.
And from the Creation of the World, according
to the best of History, 5675 Years.

Wherein is contained,
The Motion, Aspects, and Operation of the Pla-
nets; with Observations upon the Eclipses, and So-
lar Ingresses; with other remarkable Passages, as the
Moon's Southings, Sun, and Moon's Rising and Set-
ting, and Monthly Observations, &c.

Calculated according to Art, and referred to
the Meridian of the midst of *GREAT-BRITAIN*, fit-
ting the whole Monarchy without sensible Error.

THE EIGHTH IMPRESSION.

By **SALEM PEARSE,**

Student in Physick and the Celestial Science.

IMPRIMATUR, E. C.

LONDON, Printed by **J. Danks**, for the
Company of **STATIONERS**, 1726.

Ephe. 1726.

A Table shewing on what Day and Hour the Moon comes to the Bodies of the five Planets (viz. Saturn, Jupiter, Mars, Venus, and Mercury) in every Month throughout this Year 1726.

The Moon's with		The Moon's with	
January.	Mars 7 th day, at 9 night. Mercury 20 day, at 3 aftern. Saturn 20 day, at 10 night. Jupiter 25 day, at 8 morn. Venus 26 day, at 5 morn.	July.	Saturn 4 day, at 6 morn. Jupiter 10 day, at 11 night. Venus 15 day, at 2 morn. Mercury 17 day, at 4 morn. Mars 21 day, at 6 afternoon. Saturn 31 day, at 7 morn.
February.	The Moon's with Mars 3 day, at 4 afternoon. Saturn 17 day, at noon. Mercury 19 day, at 1 morn. Jupiter 22 day, at 2 morn. Venus 24 day, at 2 morn.	August.	The Moon's with Jupiter 7 day, at 6 morn. Venus 13 day, at 8 night. Mercury 18 day, at 7 morn. Mars 19 day, at 1 afternoon. Saturn 27 day, at 10 morn.
March.	The Moon's with Mars 2 day, at 9 night. Saturn 17 day, at 1 morn. Jupiter 21 day, at 10 night. Mercury 22 day, at 6 Even. Venus 23 day, at 1 morn.	September.	The Moon's with Jupiter 3 day, at 8 morn. Venus 12 day, at 2 afternoon. Mercury 16 day, at 2 morn. Mars 17 day, at 4 morn. Saturn 23 day, at 3 aftern. Jupiter 30 day, at 10 morn.
April.	The Moon's with Saturn 13 day, at 1 aftern. Venus 18 day, at 5 night. Jupiter 18 day, at 9 night. Mercury 22 day, at 11 morn. Mars 27 day, at noon.	October.	The Moon's with Venus 12 day, at 1 afternoon. Mercury 13 day, at noon. Mars 16 day, at 5 morn. Saturn 21 day, at 1 morn. Jupiter 27 day, at 1 aftern.
May.	The Moon's with Saturn 10 day, at 8 night. Jupiter 16 day, at 5 aftern. Venus 17 day, at 2 morn. Mercury 19 day, at 10 morn. Mars 25 day, at 9 night.	November.	The Moon's with Venus 11 day, at 2 afternoon. Mercury 13 day, at 4 aftern. Mars 14 day, at 6 morn. Saturn 17 day, at 1 aftern. Jupiter 23 day, at 8 night.
June.	The Moon's with Saturn 7 th day, at 2 morn. Jupiter 13 day, at 10 morn. Venus 15 day, at 1 aftern. Mercury 17 day, at 2 aftern. Mars 23 day, at 4 morn.	December.	The Moon's with Venus 11 day, at 9 night. Mars 13 day, at 9 morning. Mercury 14 day, at 5 morn. Saturn 15 day, at 3 morning. Jupiter 21 day, at 5 morning.

Note (Reader) that any Night when thou make st Observation according to the Day and Hour of the Moon with or in Conjunction of a Planet, and they at some distance, 'tis caused by their Latit.

Enter this Table on the Left hand side under Lib. with your Sum, and over Head for your Time, and in the Angle of meeting you will have your Desire. Example.

Suppose the Sum were 30^l. I enter under Lib. with the same, and again at the Sum I find for one Week 7 d. $\frac{1}{2}$. For one Month 2 s. 6 d. For two Months 5 s. For three Months 7 s. 6 d. For six Months 15 s. For nine Months 1 l. 2 s. 6 d. For a Year 1 l. 10 s. Note, after the same manner you may enter this Table with any Sum, from 1 l. to 1000 l. and in the Angle of meeting you will have your Desire.

A General Tide-Table.

Note, that the riſing and ſetting of the glorious Planet *Venus* is calculated to every tenth Day of each Month throughout this Year, and 'tis plac'd in the following Table, being very uſeful for my Countrymen to know the Hour of the Night, the which for their ſake I do deſign to continue it yearly.

A perpetual Table of Break of Day, Twilight's ending, and Venus rise and set, and Length of the planetary Hour.

The MONTHS.	Days.	Break of Day. H. M.	Twilight ends. H. M.	Arising & Setting of the Planet Venus H. M.	Planet Hour by Day. H. M.	Planet hour by Night. H. M.

Let Times and Men be what God please, yet I
Will honour **GEORGE** our King continually,
And pay my Duty to my Sovereign,
And there and then my Natives Right I claim,
In hopes Tranquillity will here remain.
God grant our King long Life, and Peace in store,
When this Life ends, with Christ live evermore.

January hath XXXI Days.

Rouze up my Muse, and dictate to thy Pen,
Consider first, then tell us how and when
England may thrive, and far more happier be,
And each Man rest in true Tranquillity.
First cast off Pride, that great and horrid Sin,
Which too too many are invested in.

[illegible]

February hath XXVIII Days.

It was the Sin of Pride ('tis known full well)
Thro' which (indeed) proud *Lucifer* he fell.
Then shall not Man (who is but only Duff)
Soon be cast down by God, who's good and just?
Next Drunkenness, the Maxim of all Evil,
For 'tis the chiefeft Free-School of the Devil.

days	80
1	22
6	22
11	22
16	21
21	21
26	21

Full Moon the 5th day, at 1 Afternoon.

Last Quarter the 12th day, at 9 at Night.

New Moon the 20th day, at Midnight.

First Quarter the 28th day, at 6 in the Morning.

High Hills and Mountains cover'd are with Snow,
Which soon with Floods the Valleys overflow.

Monthly Observations.

MON	TUE	WED	THUR	FRI	SAT	SUN	MOON	PLANETS	REMARKS
1	2	3	4	5	6	7	8	9	Saturn and Mars and Hermes disagree,
10	11	12	13	14	15	16	17	18	Lying and thieving both we manag'd be,
19	20	21	22	23	24	25	26	27	For they are very busy now we find,
28	29	30	31	1	2	3	4	5	The Times, the Times are fickle, like the Wind.
6	7	8	9	10	11	12	13	14	And now also the two Maleficks jar,
15	16	17	18	19	20	21	22	23	Instead of Peace here's likelihood for War,
24	25	26	27	28	29	30	31	1	Their Orbs are charged with malefick Rays,
2	3	4	5	6	7	8	9	10	No doubt 'twill spread a Cloud o'er some Mens Days,
11	12	13	14	15	16	17	18	19	And leave them doubtless to their bitter Ire,
20	21	22	23	24	25	26	27	28	Ravaging worse far than Vulcan's Fire;
29	30	31	1	2	3	4	5	6	Like fiery Meteors swiftly they do fly,
7	8	9	10	11	12	13	14	15	Accusing some, others they stiffly try
16	17	18	19	20	21	22	23	24	By force, by force of their Malignity.
25	26	27	28	29	30	31	1	2	For some may fall by the hard Stroke of Fate,
3	4	5	6	7	8	9	10	11	While Justice others quickly overtake,
12	13	14	15	16	17	18	19	20	If Jove with Mars their Rays don't mitigate

Note that the Roman Account is always 11 Days before the Eng. Feb. so that their 12th is our first &c.

March hath XXXI Days.

By taking too much of what would Man cherish,
 Soon lays him level with the Beast that perish,
 Then what is he in such a dismal Plight,
 If God should turn his Morning into Night?
 As often-times we have both heard and seen
 Men so cut off, just in the midst of Sin.

April hath XXX Days:

Whoredom, is very common in these Times,
 And next comes Murder, for to hide their Crimes.
 Covertness some think 'tis scarce a Sin,
 But where it commences Idolatry begins:
 To tell a Miser what will him ensue,
 He'll say, No Hurt where Profit doth accrue.

Monthly Observations.

March he is gone, but yet here
to our Sorrow
Three Days or more he will of
April borrow,
A stormy Air, Lies, and cheating
you'll find
Too frequent now I doubt a-
mongst Mankind.
If you would know from whence
much of it's done,
View *Ireland*, and *Italy*, and *Rome*,
And don't forget the Month
that's lately past,
Nor the bad Rays that happen'd
at the last,
For it denotes small Happiness
to *Rome*,
And they may have it on a time
too soon.
And *Europe* in the general don't
possess
But little of the Jewel Happiness.
ENGLAND, of all the Islands
near I see,
Does best enjoy Peace and Tran-
quillity;
Therefore let us our humble
Prayers send
To God on high, who is our only
Friend,
In all our Need, and Grief, and Trou-
ble;
If we pray true, we shall deliver'd be.

May hath XXXI Days.

Swearing and Cursing reign without Controul,
Men scruple not to lay at stake their Souls,
And Youths likewise that are scarce ten Years old.
Ah wicked Wretches! great will be your Sorrow!
Yea worse far than Sodom and Gomorrah!
If they had known the Scriptures as you do,
They wou'd repented, and remain'd till now.

(do tell,
Denotes in general to go pretty
(well.
B June

June hath XXX Days.

Backbiting yea, and bitter Couzenage
 Now acts their Passion upon mundane Stage.
 Men speaks each other fair, fair to the Face,
 When turn'd their Backs, soon evil Words take place :
 Ah, wicked World ! yea Hypocritical !
 Why dost thou daily for Damnation call ?

This Month is call'd as now it
(doth appear,
The chief and greatest Glory of
(the Year.
As for the Stars they are mostly
(inclin'd,
To stir up Man to a pure halcion
(Mind.
In hopes that worldly Affairs
(will so remain,
That Merchants and the Hus-
(bandman may gain;
By their hard Labour and in-
(dustious Care,
May reap the Product of a fruit-
(ful Year.
And let each Man render to God
(due Praise,
For sending plenty in these sinful
(Days.
Unto thy Cistern go where at
(thy will,
Thou may'st from thence drink
(Water to thy fill :
After return unto thy shady
(Vine,
And take thy rest with a con-
(tented Mind.
Yet still remember what the
(Proverb say,
A Morning fair, may end a
(cloudy Day.

B 2

July

July hath XXXI Days.

Come Mrs Envy (if that be thy Name)
 A gentle Title, tell us whence it came :
 Why ? I am first, and last, and may be found
 Even in great, and ev'ry little Town.
 My Practice, and the Business which I bear,
 Is secret Malice kept from Year to Year.

October

October hath XXXI Days.

My place is no Church often I declare,
 And yet I have thousands of Comrades there :
 Of sottish Apes I have thereof good store,
 And cunning cheating Knaves as many more ;
 And such like Friends I have in e'ry Town,
 Throughout this Kingdom may be easy found.

November hath XXX Days

That 'tis a wonder (let me tell you plain)
How Christ his Spouse so safely doth remain.
His being near who guides her with his Hand,
That she against her Enemies may stand.
And tho' they furious be, Christ can aswage,
Their fiery Darts, and stop the Lions Rage.

December

December hath XXXI Days.

Good Lord protect thy Church with thy great Pow'r,
That Wolves may not thy little Flock devour.
And gives an Heart to serve and honour thee,
Who art our Shield in our Necessity.
Protect our King, and guide him with thy Hand,
And keep both Peace and Plenty in our Land.

The Dominion of the Moon in Man's Body,

Passing under the Twelve Zodiacal CONSTELLATIONS.

♈ <i>Aries</i> , head and face.	♎ <i>Libra</i> , reins and loins.
♉ <i>Taurus</i> , neck and throat.	♏ <i>Scorpio</i> , secret members.
♊ <i>Gemini</i> , arms & shoulders	♐ <i>Sagittary</i> , hips & thighs.
♋ <i>Cancer</i> , breast and stomach	♑ <i>Capricorn</i> , the knees.
♌ <i>Leo</i> , heart and back.	♒ <i>Aquarius</i> , the legs.
♍ <i>Virgo</i> , bowels and belly.	♓ <i>Pisces</i> , the feet.

The Names and Characters of the Planets,

with the Dragon's Head and Tail.

♄ <i>Saturn</i> .	} ☉ <i>Sol</i> , or the Sun.	♀ <i>Venus</i> .
♃ <i>Jupiter</i> .		☿ <i>Mercury</i> .
♂ <i>Mars</i> .		☾ <i>The Moon</i>
	♁ <i>Dragon's Head</i> .	
	♂ <i>Dragon's Tail</i> .	

The Characters of the Aspects.

♊ <i>Conjunction</i>	} ☿ <i>Opposition</i>	△ <i>Trine</i> .
* <i>Sextile</i>		□ <i>Quartile</i>

Upon the twelve Signs.

Bold Aries both the Head and Face commands ;
 In Neck and Throat fierce Taurus glory stands.
 The Arms and Shoulder, Gemini doth sway ;
 Breast, Stomach, Ribs, the Creafish doth Obey.
 Leo the Heart, the Bellie's Virgin's share ;
 Libra of Reins and Loins doth take care.
 Over the Secrets Scorpio doth reign ;
 But to the Archer both the Thighs remain.
 And Capricorn the Knees rules at his will ;
 Aquarius hath the Legs to govern still.
 And last, the Feet by Pisces are controul'd ;
 For so far forth the Fishes dare be bold.

PEARSE, 1726.

THE
Second PART
OF THE
Cœlestial DIARY,

CONTAINING

A Chronology of most Remarkable Accidences and Occurrences that have happened in all Ages of the World, since the Creation to this present Time.

With Astrological Observations upon the Eclipses, Solar Ingresses, Various Positions, Aspects and Configurations of the Heavenly Bodies, with many other Considerable Matters.

By SALEM PEARSE,
Student in Physick and Cœlestial Science.

Wisdom VII. 17, 18, 19, 20.

For he hath given me certain Knowledge of Things that are. Namely, to know how the World was made, and the Operation of the Elements; the Beginning, Ending, and Misch of the Times; the Alterations of the Turning of the Sun, and Change of Seasons: The Circuits of Years, and Positions of Stars, the Natures of Living Creatures, and the Furies of Wild Beasts, the Violence of Winds, and the Reasonings of Men; the Diversities of Plants, and the Vertues of Roots.

1713 Peace proclaim'd <i>May 5.</i>	13
1714 <i>Queen Anne</i> died <i>August 1.</i> and <i>King GEORGE</i> Proclaim'd.	12
1716 Rebellion at <i>Preston</i> and <i>Scotland.</i>	10

Last Year (kind Reader) Divers of my Countrymen were desirous of my Publishing a Chronology; Therefore for their Sake, and to such as delight History, I have pen'd in the foregoing Pages, Most of the Remarkable Accidents and Occurrences, that have happened in all Ages of the World, since the Creation to this present Time; being Gathered or taken from the best of History; not doubting but 'twill rather merit the Reader's Approbation, than a very large Astrological Observation upon the Times; which brings me to consider.

Astrological Observations.

Of the ECLIPSES which will happen in
this Year, 1726.

THERE will be four Eclipses; two of the Sun and as many of the Moon, they happen in the following Order.

The first is of the Sun, on the 22d Day of *March*, at two in the Afternoon, invisible, by reason of the Moon's South Latitude. It falls in 12 *Deg.* of *Aries*.

The second Eclipse will be on *Tuesday*, the 5th Day of *April*, at one a-Clock in the Afternoon, of the Moon, and invisible; it falls in 26 *Deg.* of *Libra*.

The third is an Eclipse of the Sun and part Visible, on *Wednesday* the 14th Day of *September*, beginning at 3 quarters after 4. The Middle or greatest Darkness at 38 *min.* past 5. The End of the Eclipse at 28 *min.* after 6 in the Evening; so that the Sun will set 3 Digits Eclipsed. The Total Duration is 1 h. 43 *min.* 10".

The Digits Eclipsed are 6 and 3 Parts.

This falls in 2 *Deg.* of *Libra*, and in the 7th House of Heaven; this (Astrologically) signifies a sickly Air, Tempestuous Storms of Hail and Thunder; and, that Corn will now advance its Price, &c.

The fourth and last is a Visible Eclipse of the Moon, on *Friday* the 30th Day of *September*, the beginning thereof will be at 53 *min.* past 3 in the Morning, the Middle of the Eclipse at 4 *min.* after five; at which Time there will be darkned 4 Digits and 58 Parts on the South or lower Limb of the Moon's Body. The End of the Eclipse at 14 *min.* after 6 in the Morning.

The Total Duration of this Eclipse is 2 h. 21 *min.*

The Digits Eclipsed are 4 and 58 Parts.

This Eclipse falls in the 18th Degree of *Aries* and such as please to draw a Scheme of the Heavens will find the Moon Eclipsed in the 7th House, which denotes Detriment to Noblemen, Scarcity of the Fruits
of

of the Earth ; and *Mars*, being Lord of this Eclipse
stirs up much Mischief, Wars, Quarrels, Duels, Mas-
sacres, &c. hot Air, Thunder and Lightning, and
Shipwrecks, and Loss by Pyrates at Sea.

PEARSE'S Astrological Observa-
tions on the Four Seasons of
the Year, *Viz.* Winter, Spring,
Summer, and Autumn.

I. **O**N the Winter Quarter ; which commences
Astronomically on *Friday December 10. (1725)*
at 32 min. past 7 at Night, at which Time the Sun
enters the first Point or Scruple of the Tropical and
Solstitial Sign *Capricorn* ; having his greatest South
Declination from the *Æquator*, making the shortest
Day, and longest Night in our Hemisphere.

Now is the Season for to drink strong Beer,
Also each Day to feed upon good Cheer.
And one Thing more thou probably may'st lack
That is good Store of Clothing on thy Back.
Or else a Youthful Woman by the Fire,
But little more a merry Man desire.
And since some Men will thus contented be,
So I'll conclude these Lines of Poetry.

At the Sun's Ingress into *Capricorn*, we have 24 Deg.
of *Aries* on the *Medium Cæli*, and 13 Deg. of *Leo* Ascends
in our Horizon. *Mars* is just risen in the 12th House
in Opposition to *Venus* in the 7th, which denotes that
divers Persons of the Feminine Gender should suffer
Detriment, both in Body and Estate. Agues and Fe-
vers

vers will be very common, especially among those of the Female Kind, and *Venus* Angular in the 7th, afflicted by *Mars*, shews an unhappy Season for Marriages. Much sorry Weather, and considerable Quantities of Snow at some times this Winter Quarter. The Moon is just entering the Sign *Leo* and in the 12th, and *Mars* is near the Cusp of Ascendant, and the *Lion's Heart* is Ascending, which signifies that Men should incline to a Magnanimous Temper, and *Mars's* Dignities in the 10th shews Quarrels, and high Disputes among Men of great Birth, &c.

II. The Spring Quarter commences this Year, on *Wednesday* the Ninth Day of *March*, at 19 min. past 9 at Night, the Sun then entering the Oriental and *Æquinoctial* Sign *Aries*; having no Declination from the *Æquator*, but rises and sets at Six, making the Day and Night of an equal Length. This Quarter continues during the Sun's Progress through *Aries*, *Taurus* and *Gemini*. This Quarter resembles Youth, because all Things now wax green and flourish, and is the Radical Beginning of the Year, as most of the ancient Fathers think.

At this Ingress of the Sun into *Aries*, we have 5 Deg. of *Scorpio* Ascending in our Horizon, and 17 Deg. of *Leo* Culminating, at which Time the Sun and *Jupiter* be in Conjunction in the 5th House, and the Moon is in 6 Deg. of *Scorpio* on the Cusp of the Ascendant separating from a \square of *Saturn* in the third, and *Mars* is in the 9th Ready to leave the Sign *Cancer* who has been lately in Trine to the Sun in *Pisces*, and speedily after the Ingress we have a Sextile of the Sun and *Saturn* and a Sextile of *Saturn* and *Jupiter*, and a \triangle of *Mars* and *Mercury*; which signifies very Pleasant Weather during the whole Month of *March*, and a perfect Halcyon Time in Mundane Affairs, but the Opposition of *Saturn* and *Mars* on the last Day of *March*, and the Row Aspects of the PLANETS in the following Month,

of the Earth ; and *Mars*, being Lord of this Eclipse stirs up much Mischief, Wars, Quarrels, Duels, Massacres, &c: hot Air, Thunder and Lightning, and Shipwrecks, and Loss by Pyrates at Sea.

PEARSE'S Astrological Observations on the Four Seasons of the Year, *Viz.* Winter, Spring, Summer, and Autumn.

I. **O**N the Winter Quarter ; which commences Astronomically on *Friday December 10. (1725)* at 32 min. past 7 at Night, at which Time the Sun enters the first Point or Scruple of the Tropical and Solstitial Sign *Capricorn* ; having his greatest South Declination from the *Æquator*, making the shortest Day, and longest Night in our Hemisphere.

Now is the Season for to drink strong Beer,
Also each Day to feed upon good Cheer.
And one Thing more thou probably may'st lack
That is good Store of Clothing on thy Back.
Or else a Youthful Woman by the Fire,
But little more a merry Man desire.
And since some Men will thus contented be,
So I'll conclude these Lines of Poetry.

At the Sun's Ingress into *Capricorn*, we have 24 Deg. of *Aries* on the *Medium Cæli*, and 13 Deg. of *Leo* Ascends in our Horizon. *Mars* is just risen in the 12th House in Opposition to *Venus* in the 7th, which denotes that divers Persons of the Feminine Gender should suffer Detriment, both in Body and Estate. Agues and Fevers

vers will be very common, especially among those of the Female Kind, and *Venus* Angular in the 7th, afflicted by *Mars*, shews an unhappy Season for Marriages. Much sorry Weather, and considerable Quantities of Snow at some times this Winter Quarter. The Moon is just entering the Sign *Leo* and in the 12th, and *Mars* is near the Cusp of Ascendant, and the *Lion's Heart* is Ascending, which signifies that Men should incline to a Magnanimous Temper, and *Mars's* Dignities in the 10th shews Quarrels, and high Disputes among Men of great Birth, &c.

II. The Spring Quarter commences this Year, on Wednesday the Ninth Day of March, at 19 min. past 9 at Night, the Sun then entering the Oriental and Æquinoctial Sign *Aries*; having no Declination from the Æquator, but rises and sets at Six, making the Day and Night of an equal Length. This Quarter continues during the Sun's Progress through *Aries*, *Taurus* and *Gemini*. This Quarter resembles Youth, because all Things now wax green and flourish, and is the Radical Beginning of the Year, as most of the ancient Fathers think.

At this Ingress of the Sun into *Aries*, we have 5 Deg. of *Scorpio* Ascending in our Horizon, and 17 Deg. of *Leo* Culminating, at which Time the Sun and *Jupiter* be in Conjunction in the 5th House, and the Moon is in 6 Deg. of *Scorpio* on the Cusp of the Ascendant separating from a \square of *Saturn* in the third, and *Mars* is in the 9th Ready to leave the Sign *Cancer* who has been lately in Trine to the Sun in *Pisces*, and speedily after the Ingress we have a Sextile of the Sun and *Saturn* and a Sextile of *Saturn* and *Jupiter*, and a \triangle of *Mars* and *Mercury*; which signifies very Pleasant Weather during the whole Month of March, and a perfect Halcyon Time in Mundane Affairs, but the Opposition of *Saturn* and *Mars* on the last Day of March, and the Row Aspects of the PLANETS in the following Month,

P E A R S E. 1726.

Month denotes a sickly or unwholsome Air, stormy and unsettled Weather, Variety of Mundane Affairs, Especially in some of the Southern Countries, but the Spring Quarter in general should prove pretty fruitful for the Husbandman, considering that last Summer was but an Indifferent Season for the Tillage of the Earth.

III. The Summer Quarter takes its Beginning on Friday the 10th Day of June, at 11 min. past 9 at Night. Then the Sun the Glorious Lamp of Heaven having his greatest North Declination from the Æquator, maketh the longest Day, and shortest Night in our Hemisphere. This amiable fruitful Quarter continues, during the Progress of *Apollo* through *Cancer*, *Leo*, and *Virgo*, and is by Nature hot and dry, oriental and resembling perfect Age and Strength; for Things being now in their Vigour and Height of Perfection; and *Vesta* now brings forth the Fruit of her Womb, nourishing us with the Milk of her Increase, like a beautiful Mother.

At this Ingress of the Sun into *Cancer* we have 18 Deg. of *Capricorn* Ascending in our Horizon, and 23 Deg. of *Scorpio* Culminating, at which Time *Saturn* is in the Ascendant Retrograde in 3 Deg. of *Aquarius*, *Mars* is in 6 Deg. of ♊ , in the 8th, *Sol* is in the 6th, *Venus* and *Mercury* are both in the fourth, viz. ♀ is in 14 Deg. of ♋ , and ☿ is in 9 Deg. of ♌ . The *Moon* and *Jupiter* are both in the second, viz. Luna is in 20 Deg. of *Pisces*, and *Jupiter* is in 20 Deg. of *Aries*. ♄ is in the 2d in 15 Deg. of *Aries*, and ♃ is in the 8th House in 15 Deg. of *Libra*, and thus are the Heavens posited at this Summer Ingress, as to the Position of the Heavenly Bodies at this Time, and (in general) during the Summer Quarter, denotes a moderate Time in Mundane Affairs, and the Weather should probably be inclin'd to Wind and Snow, and sudden Alterations; sometimes very hot and dry, and soon changing to Cold and pinching Air, yet

yet a moderate Spring and Summer for the Fruits of the Earth, Probably not a forward Harvest but in due Time for the careful Husbandman; which brings me to consider.

IV. The Autumnal Quarter commences (according to *Scientia Stellarum*) on Monday, *Septemb. 12.* at 46 min. past 10 Mand. The Sun now entering the *Æquinoctial* Sign *Libra*, has again no Declination as is in the Spring, but maketh the Day and Night of an equal Length. This Quarter continues during the Sun's Progress through *Libra*, *Scorpio*, and *Sagittary*, and Resembles elder Age, and Melancholly; for now the Earth begins to appear like old Age, and having yielded up her ripe Fruit, *Boreas* begins to strip her of her beauteous Robes, and Clothes her in Milk White Attire.

At this Ingress of the Sun into *Libra* we have 19 Deg. of *Scorpio* Ascending in our Horizon, and 9 Deg. of *Virgo* Culminating. *Saturn* is in the 2d House, in 27 Deg. of *Capricorn*, within 5 Deg. of a Square of *Jupiter* Retrograde in 22 Deg. of *Aries* in the 4th. *Mars* is in the 12th, in 5 Deg. of *Scorpio* within Rays of a * of *Venus* in the 9th, the Moon is also in the 9th, in 29 Deg. of *Leo*, in * to *Mars* in the 12th aforesaid. The Sun is in the 10th, within 10 Deg. of the ☉, ☉ is in the 4th in 10 Deg. of *Aries*, and thus are the Heavens posited at this Autumnal Ingress. As to the Effects of the Stars, at this Time, and for the most part of this Quarter, they promise a pretty moderate Season, and though this is none of the best Positions, yet we hope to enjoy Peace and Plenty a little longer, the two △ Aspects of *Saturn* and *Mercury* in the Month *September* promiseth a good Return to our Merchants, besides it is like to be a good Season for the Harvest. No doubt but the □ of the Sun and *Saturn*, and the □ of *Saturn* and *Mercury*, and the □ of *Saturn* and *Venus* in the Month *October*, will lead some Men in the Dark, where they may perhaps
commit

P E A R S E. 1726.

commit such Follies, as will Shame them when they come to light. But,

A prudent Man foreseeth the Evil and hideth himself: but the Simple pass on, and are punished, Prov. 27. 12.

To conclude, Let us pray for the Welfare of Great Britain, and may the Blessing of Almighty GOD, attend our most Gracious Sovereign King GEORGE, now and Evermore. *Amen.*

F I N I S.

Loving Countrymen, especially to you that are living near the Place of my Nativity; Who best knows my Birth and Parentage, Care and Industry, in the Way of Study, and in other Temporal Endeavours. Divers of my Countrymen have desired me to prescribe or give Direction in Physick, not doubting by taking Care therein, I might be very helpful to my Afflicted Brethren, the which in some Kinds I have been very successful already. Therefore I intend (GOD willing) to make a farther Progress in the Affairs. The Way and Method I design to follow shall be after an Astrological Order, by which Rules I have seldom failed in Curing of Agues at the first or second Doses taken from the Virtue of Herbs gathered and prepared according to Art.

By the AUTHOR of this Book.
